Ethics in Sustainable Development

Ethics in Sustainable Development | Syllabus

The Ethics in Sustainable Development course equips you with tools and approaches to assess the actions we take when trying to help others. The course will challenge you to stop and think about how you're doing good, and whether there's a better way to go about it.

Modules		Lessons	Learning objectives

Distribution of learning effort

- Course total: 10 - 15 hours, self-paced.
- Per module: Average of 2 hours for videos, reading material, quizzes and engagement in the discussion forum.
- Final quiz-based assignment: Up to 1.5 hours to complete.

Your responsibility

You are expected to:

- complete your profile on Canvas with some background information on your areas of interest, work experience and/or educational qualifications and upload a profile picture
- master a series of modules that consist of readings, videos, presentations and notes

- undertake self-assessment quizzes at the end of each module to enhance your overall understanding of the content
- make at least one significant contribution to the discussion forum in each module (we define significant as something that adds a new perspective, provides input on resources and networks. or ask questions)
- complete the quiz-based course assignment at the end of the course

Assessments

- You will only be graded on the final course assignment. This is a summative assessment that integrates learning from all the modules.
- You are required to participate in pre- and post-course surveys and contribute to the discussion forums.
- You will not be graded on the self-assessment quizzes at the end of each module. These are formative assessments.

Grading

- You will need to achieve a grade of 75% or higher on your final course assignment to pass the course and receive a certificate of completion.
